

This is a game based on poker rules. It starts every 5 minutes and a game lasts 15 minutes. It can be played at participating locations (such as bars) or on the internet.

The game is played with a 6 X 6 board with 6 unavailable and 6 prefilled squares. The computer then displays 30 cards, each for 25 seconds and the player places each card in one of the available squares such that horizontally or vertically a poker hand, such as 3 of a kind, 4 of a kind, royal flush etc. is created. However be careful not to create a non poker hand on the horizontal while you are trying to build a hand on the vertical or vice versa. All blank cells between a black cell and the side of the board must be filled to count as a poker hand.

This is how the game board will look like before the game starts

The screenshot shows a web browser window titled "PokerStr8ts" with a URL "http://centrio.com/multi/str8ts". The game board is a 6x6 grid. The top row has a blacked-out cell, a red 5 of hearts, a blacked-out cell, and three empty cells. The second row has two empty cells, a red Queen of hearts, and a blacked-out cell. The third row has a blacked-out cell, an empty cell, a red 3 of diamonds, and two empty cells. The fourth row has a red King of diamonds, two empty cells, and two more empty cells. The fifth row has a black 7 of spades, two empty cells, a blacked-out cell, and one empty cell. The bottom row has three empty cells, a blacked-out cell, and a red 6 of hearts.

On the left side of the interface, there is a sidebar with the following information:

- PokerStr8ts
- Next card:
- Score: 0
- Cards left: 0
- Location: W02
- Screen: WS1
- User: RSK
- Game: 77

When the game starts this screen is displayed for 25 seconds so you can place the card using your game board screen. 25 seconds later it is switched to the leader board to show the scores of the placements.

This is how the leader board looks like

## Please Wait

**The game starts 5 minutes past the hour**

Please do not refresh your browser and do not use the back/forward arrow keys

This page will switch to the game board about 15 seconds before the game starts.

**When the game starts and this board has not yet switched, press the start button to play.**

Press to start playing

15 seconds before the start of the game it changes to the game board with which you will make your placements. You may also switch to the game board by pressing the “Press to start playing” button to switch.

You will use this page to place your card. If you have a touch screen device doing so on a blank cell will place the card. Otherwise use your mouse to click on a blank cell to place the card.

When the game starts the system will display the card to be played. You have then 25 seconds to place this card into an empty square.

When the game board changes to the leader board it will display the top 10 scores based on the latest play for 5 seconds

The screenshot shows a web browser window with the address bar containing the URL: <http://www.centiko.com/st/87s/1d/87d7&game=825&uascreen=SL11&uaflocat=LOC1>. The browser tabs are labeled "Leader Board" and "Playboard". The page content includes the text "Leader Board", the name "Java Joe's" next to a logo, and the message "Thanks Each Player for Their Donation". Below this is a table with the following data:

Location	Nickname	Score	Screen
LOC1	RSK1	21	SL11

At the bottom left of the page, there is a small copyright notice: "Copyright © 2012 MCM Inc. 12:50:22 12/28/12".

The leader board will switch back to the game board and display the next card. It will also display the card you just placed, as well as your current score, the number of cards left to play and all the game information.
